# Callback setTimeout

Which of the following functions will add two variables and pass the sum to a callback function after 2 seconds?

```
// A
const add = (x, y, callback) => {
  setTimeout(() => {
    callback(x + y);
  }, 2);
};
```

```
// B
const add = (x, y, callback) => {
  setTimeout(() => {
    callback(x + y);
  }, 2000);
};
```

```
// C
const add = (x, y, callback) => {
  setTimeout(() => {
    callback(x + y, 2);
  });
};
```

```
// D
const add = (x, y, callback) => {
  setTimeout(() => {
    callback(x + y, 2000);
  });
};
```
